IET and BSI urges electrical industry to have its say on IET Wiring Regulations

<https://ewnews.co.uk/>

Draft for Public Consultation open from 8 May 2024 to 5 June 2024.

The IET and BSI are calling on the electrical industry to have its say on an amendment to BS 7671:2018+A2:2022, which will go to DPC (Draft for Public Consultation) from 8 May to 5 June 2024.

#3

In 2024, we will see continued pressure on our supply chain. As we move towards 'electrifying everything,' we'll need to make grid modifications and install new electrical capacity. Research shows that most single-family homes will need to upgrade their electrical panels to accommodate a fully electrified house. Next year, households will be replacing their natural gas stoves, installing solar panels, and buying electric cars. New buildings will be built with more sophisticated energy usage monitoring, older buildings will need to be upgraded, and American-made materials will need to be sourced for infrastructure projects. With items like transformers still frequently being delayed by 52+ weeks, the strain on the supply chain will continue to mount.

#4

In 2024, we'll see more digitization than ever before. Whether using AI to find alternate materials or create building renders, using apps to track deliveries and log hours, or using software to keep large teams on the same page – the tech adoption rate will only accelerate. Data will be increasingly leveraged for deciding what to order and help inform everything from scheduling to cash flow decisions. In 2024, we'll see companies lean into digitization more than ever before to help their teams be more productive and avoid costly rework.

A WARM HELLO

As the flowers bloom and spring marches on, we at Live Electrical Distribution (UK) Limited are thrilled to bring you the latest edition of our newsletter. Spring is often seen as a time of renewal and growth, and that couldn't be more true for us this May

LIVE TERMINAL BLOCKS

STAY OUT OF YOUR COMFORT ZONE

Last month was incredibly thrilling! The Q1 sales meeting sparked innovative ideas that we are eager to implement. April marked a period of vibrant growth and exciting progress. The enthusiastic reception of our new product line reflects our dedication to excellence and progress.

A Reflection On April's Achievements

NEW TEAM MEMBERS

We also welcomed Steve Finch, Julian Duke and David Osborne to our external sales team. Their expertise and enthusiasm have already begun to resonate within the community and among our valued customers.

EXETER TOOLFAIR

The Exeter exhibition at Westpoint Arena during #elexshow2024 was a great success. Attendees were delighted with the amazing giveaways, such as treat bags and mini surprises.

Our Director and National Sales Manager engaged with visitors at the booth, discussing all aspects of Live Electrical. While the sales team secured new stockists, the technical team provided support to customers in need of technical assistance.

We appreciate your support and enjoyed connecting with you to share our enthusiasm for electrical excellence.

METAL FUSED BOX

- Metal 125A Fused Switch with a 100A Main Switch and a 20/40kA DP Surge Protective Device Without Fuse.
- Metal 125A Fused Switch with a 100A Main Switch and a 20/40kA DP Surge Protective Device featuring 3 Fuses (63/80/100A).

This unit is ideal for safeguarding and separating incoming supplies. It is suitable for both Single-Phase and Switched Neutral and can accommodate a maximum cable capacity of 35mm². The metal 125A fused switch features a 100A Main Switch and a 20/40kA DP Surge Protective Device and comes with 3 Fuse (63/80/100A). It is compliant with BS EN61439-3 standards and weighs 2.65 kg.

WHAT'S BUZZING IN MAY?

@liveelectrical_Uk

Website Relaunch

Our website is upgrading to provide a more streamlined and user-friendly resource for all your electrical needs. It promises to be more than just a fresh coat of pixels.

Harrogate ToolFair

Join us on the 16th and 17th at the YEC Harrogate Tool Fair #Elexshow, where we'll showcase our latest products. It's a fantastic opportunity to network, learn, and experience our products first-hand

New Shipment

Stay tuned for the arrival of our latest product shipment early in May. We're confident these additions will improve product lines and illuminate your outlets.

A Personal Note from Our Team

At Live Electrical, we believe in the power of connections—not just the ones in circuit breakers or switchgear but the connections we forge with each of you. Your trust in our products fuels our drive to innovate and exceed expectations.

As we move forward, we promise to maintain the high standards of quality and reliability that you've come to expect from us. We're not just suppliers but partners on your journey to electrical efficiency and safety.

Thank you for being part of our Live Electrical community. Your feedback, loyalty, and enthusiasm charge us to do better and reach higher. Let's continue to create a safer and more efficient world, one connection at a time.
